Plastic Chrome Trims	99
Plastic Wing Piping	101
Quarter Light Rubbers	105
Running Board Tread	92
Sheeting	104
Sliding Window Channel	94
Sponge Cord	92
Sponge Extrusions	90
Sponge (Fully Skinned Rectangles)	92
Sponge Neoprene Strip	92
Titanfast	87
Tools	86 & 112
Waist Strips	95 & 102
Windscreen Rubbers	105

EXTRUSIONS

Pages 20 to 85 show the range of extrusion dies that we have available and to the best of our ability are shown actual size. We have indicated which sections that are normally carried in stock and although we can supply the others, they are subject to minimum production quantities, which depend on the size of the section concerned. Please enquire, we will be happy to give you the exact position on any given section.

All profiles are manufactured to BS 3734, 1978 tolerances.

The full part number is shown underneath each section. Mostly they are made in commercial EPDM but some are in other compounds which are denoted by the letters below following the number.

Listed below is a guide to these codes which :-

EP	Ethylene Propylene Diene Monomer.
EPJ	Ethylene Propylene Diene Monomer. Jaguar type section.
J	Natural commercial. Jaguar type section.
FQ	Food Quality.
N	Neoprene (Chloroprene).
NT	Nitrile.
S	Silicone.
SQ	Steam Quality.
W/S	Good weather resistant quality. Used on our Weatherstrip range.

Compound Information

Natural Commercial Rubber

Good general purpose material where oil and heat resistance is not required.

- + Very good mechanical properties.
- + Medium weather resistance.
- + Good resilience and elastic properties.
- + Fair to good alkali and acid resistance.
- Affected by oils, fats, fuels, and oxydising acids.

EPDM (Ethylene Propylene Diene Monomer)

This material has excellent weather and heat resistant properties and is widely used for glazing and refrigeration applications.

- + Excellent weather resistance.
- + Good Heat resistance.
- + Good low temperature resistance.
- + Resistant to steam temperatures up to 120 degrees C. continuous and 150 degrees C intermittantly.
- + No migration stain of rigid UPVC materials.
- Affected by oils and fats.

Neoprene (Chloroprene)

Good resistance to heat and moderate chemicals and moderate resistance to oils. Has good characteristics to resist seawater, acids, fats, greases and many solvents. Neoprene has good ozone resistance and when a special additive is included has excellent flame retardent properties.

- + Excellent weather resistance.
- + Good mechanical properties.
- + Moderately resistant to oils and fats.
- + Flame resistant and can be flame retardent.
- Poor low temperature properties.

Nitrile (NBR)

Widely used in 'O' ring kits, resistant to petrol, fats, oil, greases and chemicals.

- + Excellent resistance to oils and fuels.
- + Good hot-oil resistance.
- + Good mechanical properties.
- + Good alkali and acid resistance.
- Moderate weather resistance.
- Moderate elasticity.
- Moderate low temperature properties.
- Moderate ozone resistance except for compounds with PVC blends.

Silicone

An expensive material suitable for applications demanding good ozone resistance and performance at extreme temperatures from - 80 degrees C. to + 250 degrees C.

- + Heat resistance up to + 250 degrees C.
- + Retains flexibility in extremely low temperatures.
- + Excellent weather resistance.
- + Excellent electrical resistivity.
- + Moderate Oil and fat resistance (special grades only).
- + Moderate fuel resistance (special grades only).
- Poor mechanical properties.

FILLER STRIPS

SF1B *

LF1B *

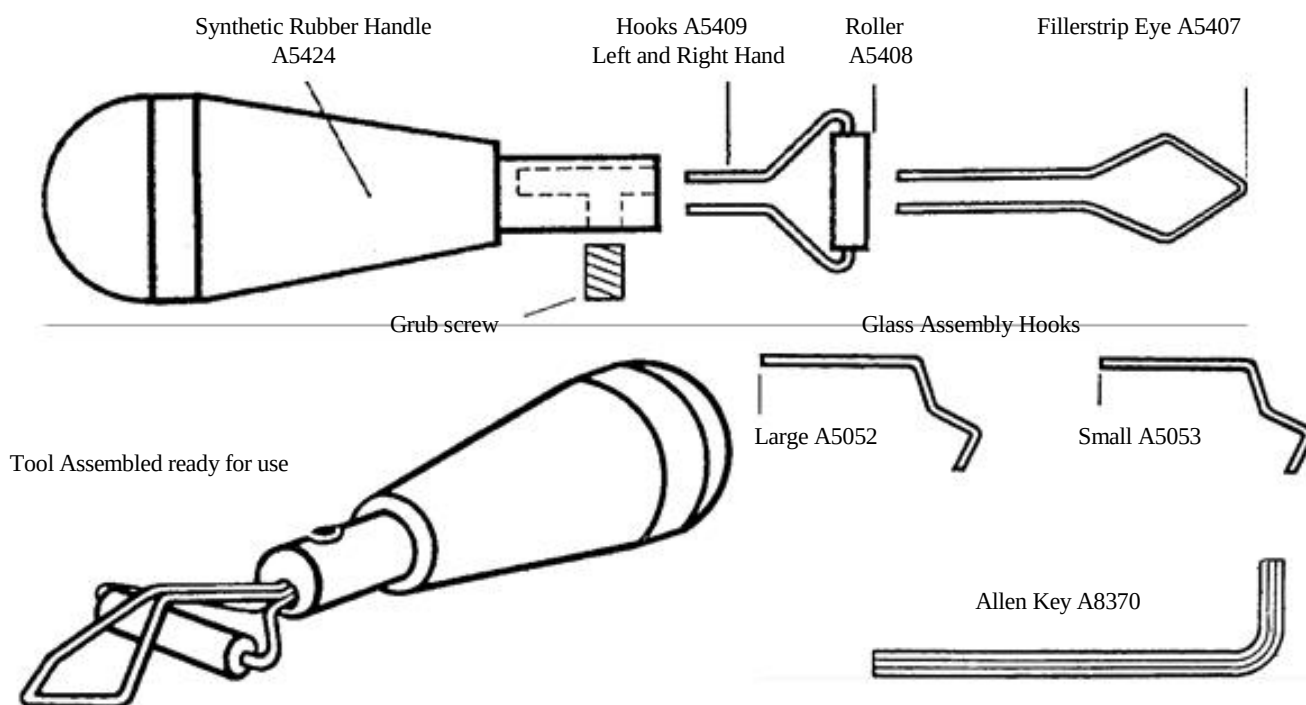

Filler strips as LF1B are available for Weatherstrips in Black Rubber, Black PVC/Nitrile, White PVC, Red PVC, Aluminium PVC and Silver Chrome PVC. SF1B and GP 241 OS are only available in Black.

(IRS 0768 W/S and IRS 0772 W/S take SF1B filler which is in Black only.)

FITTING TOOL TO SUIT PVC CHROME FILLER (CLAYLASTIC TYPE)

Part No. B5406/1. Items shown below are supplied under this part number as complete set.

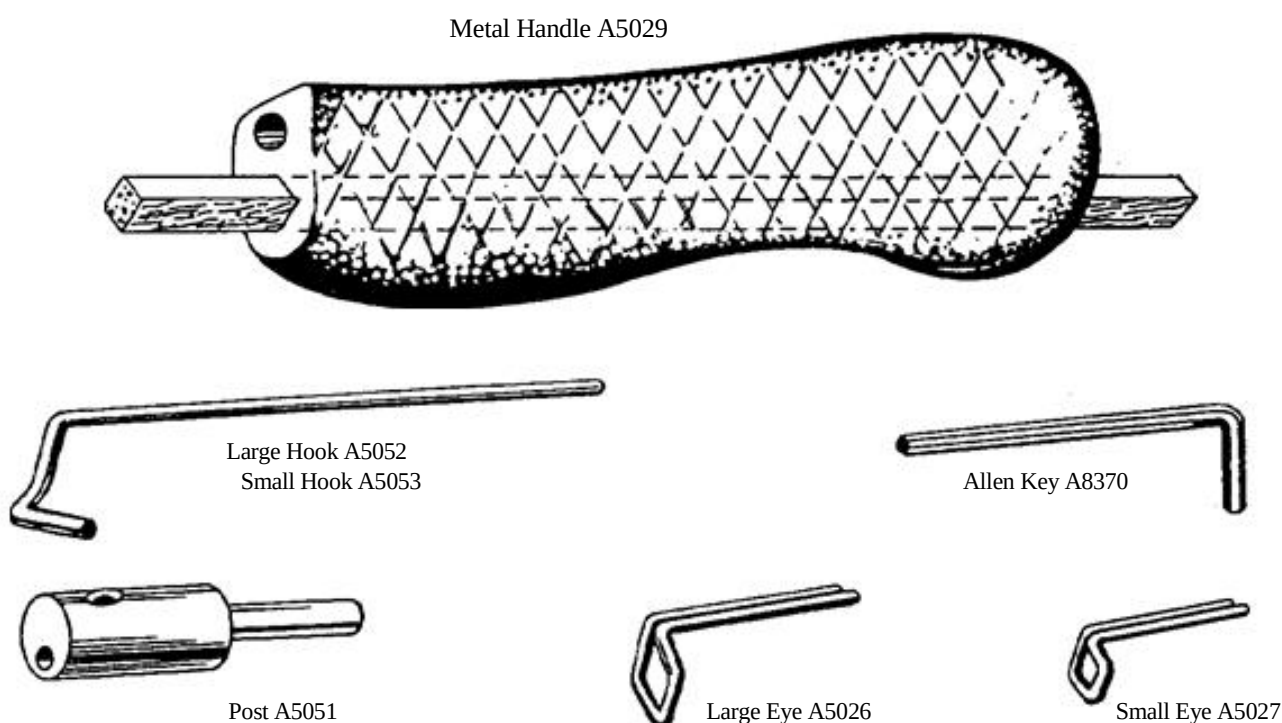

Seperate parts can be supplied from the numbers shown below.

FITTING TOOL TO SUIT RUBBER FILLER (CLAYTONRITE TYPE)

Part no. A8372. Items shown below are supplied under this part number as complete set.

Seperate parts can be supplied from the numbers shown below.

TITANFAST PVC EDGING

Titanfast speeds production and saves money by eliminating edge-finishing processes on a wide variety of quantity-produced items. It enhances appearance, covers exposed edges, provides protection and absorbs impact. It grips permanently on edges, flanges and rims of metal, glass fibre, plastic, wood and glass and eliminates the need for costly production processes such as deburring, touch up painting or any mechanical operation normally used for removing sharp edges.

Titanfast can be applied by unskilled labour in one quick, simple hand operation. It requires no tacking, tools, glueing or riveting.

Tough, hard wearing it is built to last, it's colour stays fast, it washes repeatedly. It is shrink resistant. Made of durable vinyl with a steel core. Will last just as long as the rest of your product.

Subject to edge condition, the codes illustrated will fit flanges from 0.793mm to 6.5mm thick. The single lip sections 101 and 251 are designed to permit flush contact on the exposed side.

It is easiest to apply Titanfast using the following method whether the materials is of even thickness or not:-

Using one hand, roll Titanfast along the edge and at the same time press with the thumb of the other hand at the point where the Titanfast meets the edge.

1. Titanfast is easily cut with a pair of tin snips
2. Titanfast will bend round a 19mm radius
3. It can be mitred round a tight angle corner simply by cutting out a V section with tin snips
4. The ends can be joined together by heating the touching ends with a hot piece of metal

MATERIAL SPECIFICATION

Vinyl Plastic

80 Durometer Hardness (Shore A 15 Second Reading)

Tensile Strength 2,200 PSI min.

Brittleness Temperature -20 Degrees F

Resistance to continuous heat 150 Degrees F

Segmented Metal Core

Cold rolled steel with special temper for more spring and rigidity 0.457mm thick

EXPANDED POLYETHYLENE STRIP

Self Adhesive
(P.E.)

Closed cell and crossed linked foam plastic with a fine and uniform cell structure. For sealing indoors and outdoors, where proof against dust, water, moisture is needed. Resistant to oil, weathering most acids and alkalis. Operating temperature range - 80 degrees C to + 80 degrees C, requires only 15-20% compression to give airtight sealing. Sticks to any surface, rough or smooth, easy to apply, no tools required, no fiddling with drills or hammers. Dry and clean to use.

BUILDING Seals between plastic, g.r.p. and concrete panels - weatherproofing - grout sealing.

ELECTRONICS Gasketing for sealing doors, cabinets etc.

RADIO/T.V. For protecting sensitive parts from damage. Lamp gaskets (will not tarnish)

ENGINEERING Dust seals and sealing strips, sealing uneven surfaces.

PACKAGING Cushioning, strips, pads. The closed cell structure has good cushioning characteristics.

Already being used for the above and now finding applications in Caravan and boat building - Display - Medical equipment - Automotive fields.

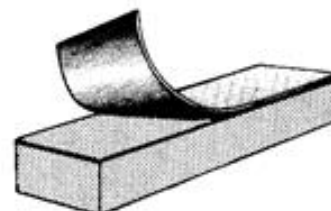

Colour dark grey.
Can be supplied in white to special order as can non-stock sizes.

Standard length coils 10 metres.

Stocked in the following sizes:-

5mm x 2mm	10mm x 2mm
12.5mm x 2mm	10mm x 3mm
